INTRODUCTION

In a “**Donation Management System**”, a donator donates on charity. Donator can be a person or an organization. Charity employees receive donation. A donator has **P_National_ID, P_Name, P_Photo, P_Password, P_Location**. A Donor Organization has **O_ID, O_Name, O_Password, O_Location**. Donation has **D_ID, D_Type** and **D_Amount**. Charity employee receives the donation and employees are identified by **E_ID, E_Name, E_Password, E_Status, E_Salary, E_Phone**. Charity employees are managed by an admin who has attributes of **A_ID, A_UserName, A_Password**. Admin creates accounts of the employees. Charity employees also collect donation from donation box which has attribute of **DB_ID** and **DB_Location**. Admin is also registered to the donation box. Admin approves needy people for donation. Needy people’s attributes are composed of **N_ID, N_Name, N_Phone, N_Location, N_Family_Members** and **N_Income**.
